

DUBOIS REC
AGREEMENT FOR INTERCONNECTION OF
RENEWABLE GENERATION SYSTEMS

This Interconnection Agreement (“Agreement”) is made and entered into this ____ day of _____, 20____, by Dubois REC, (“Cooperative”), a corporation organized under the laws of Indiana, and _____ (“Member”), each hereinafter sometimes referred to individually as “Party” or both referred to collectively as the “Parties”. In consideration of the mutual covenants set forth herein, the Parties agree as follows:

1. **Scope of Agreement.** This Agreement is intended to provide for the safe and orderly interconnection and operation of the Member’s Renewable Generation Systems (“Generator”) located at and the electrical distribution facilities owned and operated by the Cooperative. This Agreement does not supersede any requirements of any of the Cooperative’s articles of incorporation, by-laws, applicable rate schedules, rules and regulations as the same may be amended from time to time by the Cooperative (the “Rules”) and which shall be controlling in the event of a conflict between this Agreement and such Rules. This Agreement is applicable to circumstances under which the Cooperative and the Member agree that one or more Generators up to a maximum of 50 KW, as described in Exhibit A, is interconnected at _____volts to the Cooperative’s electric distribution system.

2. **Establishment of Point of Interconnection:** The point where the electric energy first leaves the wires or facilities owned by the Cooperative and enters the wires or facilities provided by the member is the “Point of Interconnection.” Cooperative and Member agree to interconnect the Generator at the Point of Interconnection in accordance with the Cooperative’s Member Requirements for Installation and Interconnection of Renewable Generation Systems, as well as the Cooperative’s Rules which are incorporated herein by reference. The Generator installation must also comply with the requirements of the current National Electric Code (“NEC”), National Electric Safety Code (“NESC”), and other applicable National, State, and local codes and ordinances.

3. **Responsibilities of Cooperative and Member for Installation, Operation and Maintenance of Facilities:** Member will, at their own expense, install, operate, maintain, repair, and inspect, and shall be fully responsible for, the Generator, unless otherwise specified on Exhibit A. Member shall conduct operations of the Generator in compliance with all aspects of the Rules and in accordance with industry standard prudent engineering practices. Maintenance of the Generator shall be performed in accordance with the applicable manufacturers’ recommended maintenance schedule and procedures.

4. **Suspension of Interconnection:** It is intended that the interconnection of Member’s Generator to the Cooperative’s electric distribution system not compromise or damage the Cooperative’s electric distribution system or violate its protection or operational requirements. The operation of the Member’s Generator and interconnection facilities and the quality of electric energy supplied by Member to the Cooperative shall meet the standards as specified by the Rules. If the Cooperative becomes aware that operation of the Member’s Generator or quality of electric energy supplied (in the case of power export) does not meet the standards as specified, then the Cooperative will notify the Member to take reasonable and expedient corrective action. The Cooperative shall have

the right to disconnect the Member's Generator until compliance is reasonably demonstrated. Notwithstanding, the Cooperative may in its sole discretion disconnect the Member's Generator from the Cooperative's distribution system without notice if the operation of the Generator imposes a threat, in the Cooperative's sole judgment, to the Cooperative's distribution system, or to life and other property.

5. **Operator in Charge:** The Member is responsible for establishing operating procedures and standards for the operation of its Generator and to designate an "Operator in Charge" who will be responsible for the safe and reliable operation of the Generator. The Member shall ensure that the Operator in Charge of the Generator is competent in the operation of the Generator and is aware of the provisions of any operating agreements and regulations relating to the safe operation of electrical power systems. The Operator in Charge is the person identified by name or job title responsible for the real time operation of all electrical facilities related to the interconnection of the Generator owned by the Member.

The Operator in Charge for Member is:

Name: _____

Address: _____

Phone: _____

6. **Testing and Testing Records:** The Member shall provide to the Cooperative all records of testing. Testing of protection systems shall be limited to records of compliance with standard acceptance procedures and by industry standards and practices. These records shall include testing at the start of commercial operation and periodic testing thereafter. Factory testing of pre-packaged Generators and the protective systems of small units shall be acceptable. In the case of a factory test, the Member needs to provide a written description and certification by the factory of the test, the test results, and the qualification of any independent testing laboratory. In addition, the settings of the equipment being installed are to be approved by the Cooperative prior to interconnection.

7. **Access:** Access is required at all times by the Cooperative to the Member's Generator for maintenance, monitoring and meter reading. The Cooperative reserves the right, but not the obligation, to inspect the Member's facilities.

8. **Maintenance Outages:** Maintenance outages will occasionally be required on the Cooperative's distribution system and the Cooperative will provide as much notice and planning as practical to minimize downtime. It is noted that in some emergency cases such notice may not be practical. Compensation will not be made for unavailability of Cooperative's distribution facilities due to distribution system outages.

9. **Disconnection of Facilities:** Member retains the option to disconnect its Generator from the Cooperative's distribution system, provided that Member notifies the Cooperative of its intent to disconnect by giving the Cooperative at least ten (10) days' prior written notice. Such disconnection shall not be a termination of this Agreement unless member exercises rights under Section 13.

10. Net-Billing Rates and Procedures: Cooperative will utilize a net-billing process for Generators interconnected with the Cooperative's distribution system. Under the net-billing process, the Cooperative will calculate on a monthly basis the amount due from the Member for all electric service provided by the Cooperative to the Member under the appropriate Retail Rate Schedule. Cooperative will net against the amount due from the Member, an amount based on the electric service generated by the Generator based on the Cooperative's Renewable Generation Rider, Rate Schedule RG. If the value of the generation service the Member provides to the Cooperative is less than the value of the electric services the Cooperative provided to the Member, the Member will pay Cooperative the net difference. If the value of the generation service the Member provides to the Cooperative is greater than the value of the electric services Cooperative provided to the Member, the Member will receive a credit that will be applied to future billing periods. If the Member discontinues operation of the Generator, any remaining credits will be credited to the Member. If the Member leaves the service area of the Cooperative and is no longer provided electric service by the Cooperative, any remaining credits will be paid to the Member.

Initial: ____ The member understands that Dubois REC's Renewable Generation Rider rates are not guaranteed and can be subject to review and may be changed periodically as wholesale costs or other financial conditions justify.

11. Metering: The Cooperative shall purchase, own, install and maintain such metering equipment as may be necessary to meter the electrical output of the Facilities in accordance to Section 10. Any additional metering costs required to interconnect and measure electricity produced and delivered in accordance to Section 10 and the Renewable Rate Rider shall be borne by the Member. An estimate of such costs shall be included with this agreement.

12. Electric Transformer and Electric Distribution System: The Cooperative shall purchase, own, install and maintain Cooperative Transformer(s) and other Cooperative electric distribution system equipment as may be necessary to interconnect the Member's Renewable Generation Facilities in accordance to Section 10. Any additional Cooperative Transformer(s) and Cooperative Electric Distribution System costs required to interconnect the member's Renewable Generation shall be borne by the Member. An estimate of such costs shall be included with this agreement.

13. Liability and Indemnification: The Member assumes all responsibility for the electric service upon Member's premises at and from the Point of Interconnection and for the wires and equipment used in connection therewith; and Member will protect and save Cooperative harmless from all claims for injury or damage to persons or property, including but not limited to property of Member, occurring on or about Member's premises or at and from the Point of Interconnection or flow of electricity from Cooperative, occasioned by such electricity or said wires and equipment, except where said injury or damage is proved to have been caused solely by the negligence of the Cooperative. The Member will (a) pay the Cooperative for all damages to Cooperative's equipment, facilities, or distribution system, and (b) save and hold Cooperative harmless from all claims, demands, and liabilities of every kind and nature for injury or damage to, or death of, persons and/or property of others, including costs and expenses of defending against the same, arising in any manner in connection with Member's Generator or the operation thereof. The Member shall also indemnify, defend and hold the Cooperative, its employees, contractors, members and agents ("Indemnities") harmless from and against all damages, losses, costs, expenses, and claims, including attorneys fees, incurred by the Indemnities for injury or damage to persons or property, including but not limited to the property of the Cooperative, which arise or result,

directly or indirectly from the Member's ownership, operation and interconnection of the Member's Generator and interconnection facilities.

14. Insurance: The Member, at their own expense, shall secure and maintain in effect while interconnected to the Cooperative's distribution system liability insurance insuring Member's indemnification obligations under Section 11 above, with a combined single limit for bodily injury and property damage of not less than \$100,000 for each occurrence. A Certificate of Insurance evidencing the requisite coverage shall be provided to the Cooperative prior to interconnecting to the Cooperative's distribution system. Cooperative shall be permitted to periodically obtain proof of current insurance coverage. The Member will not be allowed to commence or continue interconnected operations unless evidence is provided that satisfactory insurance coverage is in effect.

15. Effective Term and Termination Rights: This Agreement shall be effective upon execution by both Parties and shall continue in full force and effect so long as the Member's Generator is interconnected to the Cooperative's electric distribution system. This Agreement may be amended by the Cooperative without the consent of the Member upon 30 days prior written notice to the Member. This Agreement shall terminate on the date that the Member permanently de-installs its interconnection of its Generator with the Cooperative's system and provides notice thereof to the Cooperative, provided, however, any obligation contained herein which would naturally survive the termination of this Agreement, including but not limited to the Member's indemnification obligations, shall survive the termination of this Agreement. This Agreement may also be terminated as follows: (a) Cooperative may terminate upon failure by the member to generate energy from the Generator and deliver such energy to the Cooperative within six (6) months after completion of the interconnection; (b) Cooperative may terminate this Agreement by giving the Member at least thirty (30) days prior written notice that the other Party is in default of any of the terms and conditions of the Agreement or the Rules or any rate schedule, tariff, regulation, contract, or policy of the Cooperative, so long as the notice specifies the basis for termination and the default is not incurred within such thirty (30) day period; (c) Cooperative may terminate by giving Member at least sixty (60) days notice in the event that there is a material change in an applicable law, or any requirement of the Cooperative's wholesale power supplier or of any transmission utility, independent system operator or regional transmission organization having responsibility for the operation of any part of the Cooperative's distribution system..

16. Compliance with Laws and Rules: Both the Cooperative and the Member shall be responsible for complying with all applicable federal and state laws, rules and regulations. The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Rules, which Rules are hereby incorporated into this Agreement by this reference. The Cooperative shall have the right to change any of the Rules at any time.

17. Severability: If any portion or provision of this Agreement is held or adjudged for any reason to be invalid or illegal or unenforceable by any court of competent jurisdiction, such portion shall be deemed separate and independent, and the remainder of this Agreement shall remain in full force and effect.

18. Entirety of Agreement and Prior Agreements Superseded: This Agreement, including the Rules and all attached Exhibits, which are expressly made a part hereof for all purposes, constitutes the entire agreement and understanding between the Parties with regard to the interconnection of the facilities of the Parties at the Points of Interconnection expressly provided for in this Agreement. The Parties are not bound by or liable for any statement, representation, promise, inducement,

understanding, or undertaking of any kind or nature (whether written or oral) with regard to the subject matter hereof not set forth or provided for herein or in the member application, or other written information provided by the Member in compliance with the Rules. It is expressly acknowledged that the Parties may have other agreements covering other services not expressly provided for herein, which agreements are unaffected by this Agreement.

19. **Assignment:** At any time during the term of this Agreement, the Member may assign this Agreement to a corporation, an entity with limited liability or an individual (the "Assignee") to whom the Member transfers ownership of the Generator; provided that the member obtains the consent of the Cooperative in advance of the assignment. The Cooperative's consent will be based on a determination that the Assignee is financially and technically capable to assume ownership and/or operation of the Generator. The company or individual to which this Agreement is assigned will be responsible for the proper operation and maintenance of the Generator, and must agree in writing to be subject to all provisions of this Agreement.

20. **Notices:** Notices given under this Agreement are deemed to have been duly delivered if hand delivered or sent by United States certified mail, return receipt requested, postage prepaid, to:
(a) If to Cooperative:

Greg Dilger, System Engineer
Dubois REC
PO Box 610
1400 Energy Drive
Jasper, IN 47547-0521
812-482-5454 (phone)
812-482-7015 (fax)
gdilger@duboisrec.com

(b) If to Member:

The above-listed names, titles, and addresses of either Party may be changed by written notification to the other, notwithstanding Section 18.

19. **Limitations (No Third-Party Beneficiaries, Waiver, etc.):** This Agreement is not intended to and does not create rights, remedies, or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the Parties, and the obligations herein assumed are solely for the use and benefit of the Parties. The failure of a Party to this Agreement to insist, on any

occasion, upon strict performance of any provision of this Agreement will not be considered to waive the obligations, rights, or duties imposed upon the Parties.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be signed by their respective duly authorized representatives.

EXHIBIT A
LIST OF GENERATORS

Member will, at its own cost and expense, operate, maintain, repair, and inspect, and shall be fully responsible Generator unless otherwise specified on Exhibit A.

GENERATOR NUMBER _____

[The following information is to be specified for each Point of Interconnection, if applicable]

1. Name: _____
2. Generator location: _____
3. Delivery voltage: _____
4. One line diagram attached (check one): / _____ Yes / _____ No
5. Facilities to be furnished by Cooperative: _____
6. Facilities to be furnished by Member: _____
7. Cost Responsibility: _____
8. Supplemental terms and conditions attached (check one): / _____ Yes / _____ No
9. Cooperative Rules for system interconnection attached (check one): / _____ Yes / _____ No
10. Appropriate rate schedules attached (check one): / _____ Yes / _____ No
